

Ashish Kumar Jha

Curriculum vitae

EXPERIENCE

JAN 2019 - PRESENT

Technical Analyst

Goldman Sachs, Bengaluru

Currently I am in the Liquidity Risk Technology Team in the Risk division of the firm. The team manages and reports the Liquidity of the firm by calculating several metrics like 5G, LCR etc. I have worked in ETL processes, Data Archival System, Signoff Service and Adjustment Service.

Tech Stack: React/Redux, Slang (in-house), Java

MAY 2018 - JULY 2018

Summer Intern

Goldman Sachs, Bengaluru

I interned in the Corporate Treasury team in the Finance Division. I was responsible for creating web application using react and node to automate the workflow involved in publishing metric CCAR to the federal reserve.

ACADEMIC PROJECTS

React/Redux, NodeJs

Q-TV Data Scraping

Aim of this assignment was to develop a web application that can be used to stream popular TV Series and movies from all around the internet by scraping data from popular free services without actually storing the content. It features user management profiles and suggestions based on their activities.

Java, Jsoup

MU-SLCM Android App

This was a college project done under the IT department, where I was involved in developing an android application for an already existing web equivalent of the college's student management portal.

Dot Net, SQL Server

Psych - Online Multiplayer Game

Based on the popular mobile game Psych, this was a self made project to implement its web version using Dot Net and SQL server. It is a multiplayer game in which player has to make up fake answers to real trivia questions. Player gets points for guessing the right answer.
